Introduction:

Srms.com is an online web-based project for those admins who are looking for keeping records of their students. Nowadays it is difficult to keep records physically as there are chances of misplacing it somewhere. srms.com will work here as a virtual community, where admins will get to keep details of any student they want , without any difficulty.

The person who need to become an admin and want to use our site for keeping records of any kind of students needs to email us through our contact us module. They will go through a small registration process and after verification of their Id's they will be provided their user Id's and password. So that they an access our website.

Objectives:

This project mainly focus on keeping the records of any kind of student safe and secure. This project provides opportunity to the admins who are unable to keep record of their students because of some reasons and we also know that now a days keeping records physically has became so tough as we have some misplacement fear or ant kind of fear. This project makes things easy for admins to keep the details and records of their student which will be stay safe and secure here with us. Admins can add new student, can edit the existing student and can also delete the details of any student they want.

Description:

Srms.com provides the opportunity to those admins who are unable to keep details of their students so that they can use our site and keep every record they want to in very easy and efficient manner.

This project consists of various modules which works together to make this website a success.

This project is basically for admins who are searching for a platform where they can keep their records as well as details of their students safe and secure and in very easy manner, and there our website provides them that platform as it is very easy to use only thing u need is details of student and your user id and password.

Those who don't have id and their passwords can contact our team member through contact us section. Our team member will do a small verification about where they teach and what are their qualifications, after verification they will be provided with their respective user ids and passwords.

By using that login id and password they can login to their respective account and can add details of new student as well as they can also modify the data of any existing student and if they want to delete the data of any student the admin can do that also.

And if anywhere they arise with some issue or any kind of issue they can contact us through our emails provided in our website.

MODULES:

Every modules used in this project is explained under:-

Admin Login:

In the login section, an admin can login by giving his/her id and password to add details of new student, modify details of existing student or to delete the records of any existing student.

About Us :

In this module, people will come to know about our team who have worked with all their efforts to make this project true. You all can get every details of our team so that in any case anyone of you want to contact them then you can.

Manage students:

This module is for admins only, they can see the overall statics data, number of students they have registered, how many students are there, every kind of data of students are visible to admins in this section.

Add student:

This module is also for admins only, they can use this module to add new students if they want to. They need to fillup all the necessary field of that student like name, gender, unique id, admission year state city etc. so that it will become easy for them to find them quick whenever required.

Search student:

In this module if admins need to find the details of any specific student they need to enter his/her unique id the search box so that they reach their destination quickly.
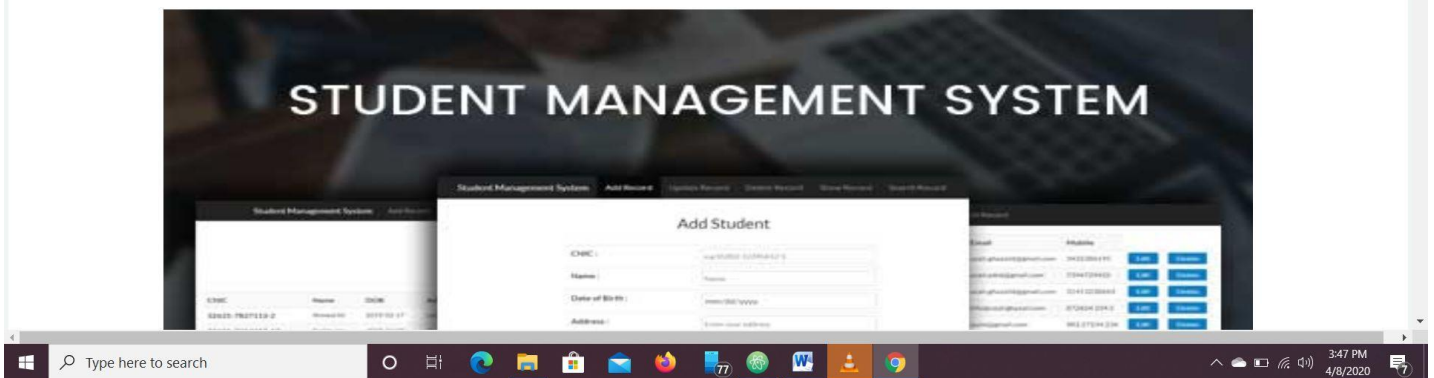

Contact Us:

Through the contact us module people who want to become an admin in our website can contact our team for verification process. After that they will be provided their user ID's and passwords and if anyone have any kind of issue with our site can contact us through this module.
